

Anil Asari

OBJECTIVE

Dedicated Professional, committed to long term career in Application Software development, implementation, maintenance and Support environment. I will be a good team player, supportive and have an enthusiasm to upgrade the technical skills to meet the needs of changing business environment.

SUMMARY

- 1.8 plus years of professional experience in all stages of the SDLC (Software Development Life Cycle) involving studying of the user requirements, analyzing, designing, implementation, testing, and deployment and maintaining of various stand-alone, intranet, client-server and web-based projects with exposure to diverse business domain.
- Working experience with C#.Net, Web API, Angular 8,11,12,SQL, CSS, HTML5, Bootstrap.
- Strong knowledge of modern frontend technologies, best practices and load speed optimization techniques.
- Worked on Angular Custom Directives, Services, Events and injectors.
- Responsible for design and development of the web pages from mock-ups and psd.
- Expertise creating user validation forms and sending data to server using RESTful services.
- Experience in using Chrome Developer Tools and Firebug for debugging and troubleshooting the code.
- Experience in working with Rxjs libraries along with Angular Http and Http Client.
- Experience in making Responsive Web Pages using Bootstrap.
- Experience in creating self-contained, reusable and testable modules and components.
- Effective communication and interpersonal skills with the ability to maintain good relations and share technical ideas with users or clients, technical and management staff.
- Strong organizational skills along with the ability to accomplish multiple tasks under extreme pressure, and meet specific deadlines.
- Ability to analyze and understand complex problems and generate appropriate technical solutions independently.
- Strong analytical and problem-solving skills, quick learner.
- Excellent communication, interpersonal and team skills. Self-starter with positive attitude and sense of humor.
- Ability to grasp and apply new concepts quickly and stay updated with latest trends and technical advancements.
- Strong debugging and troubleshooting skills.
- Interact and effectively communicate with business partners and other staff; be seen as a technical expert, and utilize this expertise to provide technical advice and support
- Good Presentation skills, problem solving skills and learning attitude.

ACADEMIC QUALIFICATION

- Bachelor of Engineering (ECE) from Methodist College of Engineering & Technology (Affiliated to OU).

PROFESSIONAL EXPERIENCE

- Currently working at Audree info Tech Pvt.Ltd, Hyderabad as a Software Engineer from Jan 20th 2021 to Till Date.
- Worked at Astoria Technologies (I) Pvt Ltd, Hyderabad as a System Engineer from Aug 20th 2019 – Jan 31th 2020.

SKILL SUMMARY

Programming Languages	: C#.net, Typescript, JavaScript
Client Side Frameworks	: Angular 6,7,8,9,10, Bootstrap
Server Side Framework	: Asp.net Core
.Net Framework	: .Net Framework 4.6
Distributed Technologies	: Web API
ORM Tools	: LINQ, Entity Framework
Scripting Languages	: HTML, JavaScript, CSS
Design Patterns	: Singleton, Factory, Dependency Injection
Database	: Microsoft SQL Server-2016,
Operating Systems	: Microsoft Windows 7,8,10,
IDE/Tools	: MS Visual Studio-2015,2017,2019, Visual Studio Code
Web Server	: Internet Information Server (IIS7, 10)

Professional Experience:

Title : LIR (Laboratory Incident Report)

Environment : Angular, Web APIs, SQL Server.

Client : Hetero Drugs Private Limited.

Description: Application is Developed to initiate the incident report and to provide complete details associated with the incident to investigator, to preserve and store all the solutions, standards and reagents used in the analysis until investigation is completed and to implement Corrective Action preventive Action proposed as per incident Report.

Responsibilities:

- Analysing business requirements, participated in technical design, development.
- Implemented project using Agile SCRUM methodology. Involved in daily stand-up meetings,
- Creating new Project structure as per Business Requirements.
- Implemented Dynamic Routing based on User Role in single page application.
- Created lazy loaded modules to optimize the performance of application.
- Used Angular \$http to send GET/POST request to fetch data from server.
- Used Angular as framework to create Single Page Applications which can bind data to specific views and synchronize data with server.
- Created custom directives and filters using Angular built-in \$http service from controller through dependency injection.
- Involved in designing and creating database tables and views.
- Built reusable custom-directives and custom-filters for DOM manipulation and format the displayed data in the view.
- Involved in designing and developing to perform and implement business logic, Updating/retrieving the data through web API to/from SQL Server Database.
- Involved in implementing ASP.net Core Web APIs.
- Maintained the code using version control system like Git.

Title : RIMS (Regulatory information management system)

Environment : Angular, Web APIs, SQL Server.

Client : Hetero

Description: RIMS is an application which was developed for Regulatory Affairs to maintain all the Product Information, which can provide a comprehensive online information about the products with their Market, Region, primary packing and secondary packing details etc., to ensure that approval is maintained for as long as the company wants to keep the product on the market.

Responsibilities:

- Application Coding
- Developed Order flow and Admin modules.
- Implemented Common alert box Services.
- Implemented Common Excel Bulk Upload.
- Developed User modules.
- Involved in designing user interfaces.
- Worked on Files Input/Output.
- Implementing pdf from final Summary Report Data.
- Handling huge amount of Data from multiple Components while Performing Curd Operations.

Title : WMPS (warehouse management portal system)

Environment : Angular, Web APIs, SQL Server.

Client : Hetero.

Description: WMPS is a platform used for Transactions In between Warehouse and other departments, Maintaining and Tracking of Inventory. Transactions may include Inward, Indent, Receipt, Dispensing and Issuance of Raw Materials, Solvents, Intermediates, Finished Products etc. and dispatch of Intermediates and Finished products.

Responsibilities:

- Implemented Dynamic Approval Level Configuration.
- Implemented Common Excel and Pdf Download Functionality.
- Implemented Auto numbering Generation
- Developed Order flow and Admin modules.
- Developed User modules.
- Involved in designing user interfaces.
- Writing Functions and Bug fixation.
- Generating Reports from Summary.

Title : AstorSuit

Environment : Angular, Web APIs, SQL Server.

Client : Singapore Oil Rig Industries.

Description : AstorSuite is designed in a modular fashion, each module can be used individually or combined to solve needs from enterprise clients in multiple areas. Improves productivity and ensure of Employee Safety

Responsibilities:

- Implementing Ui from psd,
- Developed certain features of the application functionality i.e. CRUD (Create, read, update, delete) features using and Responsive Design.
- Implemented Drag and Drop List using Material.
